EDUCATION

Master's degree in Computer Science

Hochschule schmalkalden-University of Applied Sciences

oct. 2023 – Now

Schmalkalden, Germany

Information Technology Engineer

Higher School of Engineering and Technologies of Tunis

Sep. 2021 – Now

Ghazela, tunisia

Mathematical and physics diploma

Preparatory institue for pre-engineering studies of sfax

Sep. 2019 – Juin 2021

Sfax, Tunisia

EXPERIENCE

RDI research group ESPRIT

Data Science Intern

July 2023 – September 2023

ghazela, tunisia

- As a part of a 2-members team I helped in developing a cutting-edge recommendation system for an online marketplace , 97% of accurate recommendations.

Keywords : Python, Collaborative filtering , Content filtering , Machine Learning

3S Startup

Backend Developer Intern

July 2022 – September 2022

Tunis, Tunisia

- Assisted in development of the Backend end of an online marketplace using Django , SQL server , MongoDB . optimized database queries, resulting in a 12% reduction in page load time and improved user experience.

Keywords : Django, Djongo, Pymongo, SSMS, MongoDB, SQL, NoSQL.

PROJECTS

Conceptual graph-based Recommendation System for PRM issues: Ontology Learning September 2023-November 2023

Spearheaded the development of a groundbreaking knowledge graph and chatbot for Project Risk Management (PRM), revolutionizing the way organizations approach risk assessment.

- engineered a custom **LayoutParser Model** to extract valuable insights from the PMBOK book ensuring the original structure of the book, then Leveraged post-tagging, lemmatization and normalization, to refine the extracted text.
- Employed state-of-the-art **RAKE model** to extract relevant keywords and fine tuned the **query2triplet model** to generate Triplets, with an outstanding accuracy reached 96% .
- Architected and implemented a **graph neural network (GNN) model** to build a novel knowledge-graph with 465 nodes and 1082 edges using **Deep Graph Library**.
- Combined a two-layers GraphSAGE model and a dotpredictor to successfully predict links between entities, reached interesting AUC value 93 with 0.048 as loss.
- Integrated the knowledge graph into a robust chatbot implemented with flask.

Keywords : Python, NLP, Ontology learning, LLM, Graph neural network (GNN), Pytorch, DGL, Keyword Extraction

Intelligent machine :Reverse vending machine

February 2023-april 2023

Developed an intelligent Robot that sorts bottles and cans, identifies brands, and measures volume accurately. secured the 3rd place out of 200 Best projects at esprit .

- Fine-tuned **"centernet hg104.512x512"** pre-trained model for the object recognition , achieving an outstanding 95% detection accuracy, surpassing YOLOv7 by 2%.
- Fine-tuned **InceptionV3** model to identify brands by **feature extraction technique** with a remarkable 97% accuracy rate.
- Generated a comprehensive dataset ,including height, width, and brand, derived from object detection results. fueled an Artificial Neural Network (ANN) model, achieving an impressive 98% accuracy in classifying bottle volumes.
- Developed a user-friendly **Django-based** web application, integrated with **PostgreSQL**, featuring real-time gamification System.

Keywords : Python, Django, PostgreSQL, Computer vision, image segmentation, image processing, object recognition, feature extraction

KEY SKILLS

Programming Languages: Python, Java, C, SQL

Big Data&Machine Learning: Spark, Hadoop, Python (eg.numpy, pandas,matplotlib, Tensorflow,PyTorch, Keras, Scikit-Learn, Open-cv, NLTK),Computer vision,image captioning,NLP information retrieval, documents embedding,transformer-based models,video sequence classification,neural networks, MLOps.

Data science&miscellaneous technologies: Data mining, data engineering,Statistics, ETL pipelines, web scraping, statistical analysis, feature engineering, data visualization,Linear Algebra, Time series, Hypothesis testing,FastAPI,Linux, GitHub, Git, Docker, Latex, Django

Databases: PostgreSQL, MongoDB, Microsoft SQL Server

CERTIFICATIONS

- Applications of AI for Anomaly Detection Using Generative Adversarial Networks By NVIDIA
- Building Transformer-Based Natural Language Processing Applications By NVIDIA
- Natural Language Processing Specialization By Coursera & DeepLearning.ai

LEADERSHIP / EXTRACURRICULAR

Inceptum Junior Entreprise

Mars 2022 – Present

Consultant

ESPRIT

- * Senior Member of commercial development department at "INCEPTUM" junior enterprise.
- * Senior Member of project department at "INCEPTUM" junior enterprise.

DeepFlow Club ESPRIT

November 2022 – Aout 2023

Project Manager

ESPRIT

- * Spearheaded a Team of 5 members , sucessfully delivred an AI project for our partner (Faza.tn)

LANGUAGES

- Arabic(native)
- English (Fluent)
- Deutch(A1.2)
- French(Fluent)
